Re: Graland Country Day School
Fieldhouse Project

Dear Mike,

I want you to know how invaluable you and your services have been as Owner's Representative during the design, construction and close out of the Fieldhouse project for Graland Country Day School. Your meticulous record keeping, excellent knowledge of construction techniques, scheduling and contracts contributed immeasurably to the success of the project. You were our point man on a daily basis with the general contractor and architect and I was never in doubt that the project was always under control.

The \$10 million facility was constructed on an all-cash basis made possible by private donations. When dealing with that type of equity, flawless stewardship of the project is paramount and you performed admirably.

I have recommended to the Board of Trustees that they retain your services for the next phase of the campus renovation. Also, please feel free to use me as a business or personal reference for you at any time. You are a true professional and it has been my pleasure to work with you.

Best personal regards,

Stephen F. Clarke

Trustee

Graland Country Day School
Chair, Facilities Planning Committee
